

20-20 DESIGN

OVERVIEW	FEATURES & BENEFITS	PRODUCT MATERIALS	SYSTEM RECOMMENDATIONS	RECENTLY ADDED MANUFACTURERS
--------------------------	---	-----------------------------------	-------------------------------	--

Intuitive, catalog-driven software for designing and selling kitchens and baths

Processor:	Intel Pentium 4 2.0 GHz or AMD Athlon XP 2400+ (or faster)
Operating System:	Windows XP Professional 32 bit platform Edition/Windows Vista 32 bit platform Edition
RAM:	1024 MB or more
Security Device:	25-pin printer port (parallel port) or USB port
Video Card:	32-bit Video card - 128 MB of RAM (3D OpenGL accelerator and DirectX compatible)
Hard Drive:	3GB or more free disk space
DVD-ROM Drive:	DVD, CD: 24X or more

PLEASE NOTE: All current 20-20 Technologies' software do not function with the Windows XP & Vista 64 bit platform.

We are currently testing our different applications on the 64 bit platform and therefore do not recommend using it at this time.

Suggested Accessories

- Backup device such as Zip drive or DVD/CD-Writer
- High speed internet connection
- Power bar with surge protection
- High resolution printer
- 3 button scroll mouse

NOTES

- Ensure with hardware supplier that the RAM and hard drive can be easily upgraded if required.
- Two types of security device are available for our software, Parallel or USB.
- 20-20 does not support any external device plugged onto the same LPT port as the security device. (i.e. external zip drive or floppy drive)
- Certain printers may require additional RAM and/or disk space.
- We recommend an independent video card. Please avoid built in video card (chipset)
- Please adjust your screen resolution at 1024x768 or higher
