Webinars

Webinars are live seminars offered weekly over the Web. Led by expert instructors, these content-rich workshops provide loads of insightful tips and valuable information that you may not find anywhere else. You will be able to see the instructor's screen and hear them speaking, as if they were right there with you in your office!

Webinars are **FREE** for Cadsoft Customer Care clients, but you must pre-register to receive the login details. Seating is limited so register early! Just e-mail sales@cadsoft.com.

Not a Customer Care client? No problem! For as little as \$50 you can register for a 2-month membership and participate in as many as 8 Webinars. Call 1-888-223-7638 for details.

- ▶ **Getting Started.** Learn how to successfully get started using Envisioneer. Even if you have been using it for a long time, you can still learn some great tips!
- ▶ **Roofs.** Demonstrates all roof insertion methods and shows you how to edit existing roofs to create complex and unique roof layouts.
- ▶ **Kitchen Design.** Learn how to insert and customize cabinets, and insert custom backsplashes, countertops and appliances.
- ▶ **Decks.** Insert decks using various options, create new deck styles, edit the deck shape, and customize the construction of a deck. Includes the creation of bi-level decks.
- ▶ **Bathroom Design.** Learn how to insert custom shower walls, fixtures, platform tubs, customized vanities, and incorporate custom materials.
- ▶ **Working Drawings.** Learn how to insert and customize title blocks, insert views of your Envisioneer model onto worksheets, and edit your working drawings.
- ▶ **Rendering.** Discusses materials, their various properties, and how they affect a rendering's appearance. Information about light and light sources, inserting and editing cameras, and how to adjust rendering settings.
- ▶ **Catalog Management.** Learn how to reorganize the catalog, incorporate new elements, edit existing elements, and lock the catalog to editing.
- ▶ **Remodel Design.** Learn how to create new materials in the catalog and apply them to new, existing or demolition construction work. Learn how to insert and differentiate these elements effectively in a model as well as quantify them.
- ▶ **Landscape Design.** Recreate the topography of your site by adjusting terrain settings and inserting terrain elements. Create a complete landscape plan by adding landscaping elements.
- ▶ **Q & A.** Open to all Cadsoft customers worldwide, this interactive session provides a place to ask any question you may have about Envisioneer, and receive top-notch answers from our panel of experts. Tips and tricks for improving your productivity will also be presented.
